02 BEAM + RAIL

BOX 2

* Verwijder een extra 30 mm aan de brede zijde van de balk + verwijder een extra 10 mm van de rail (door afwezigheid van een slaglat bij dubbele deuren).

Enlever 30 mm supplémentaires sur le côté large de la traverse + enlever 10 mm supplémentaires du rail (en raison de l'absence d' un latte battant sur les doubles portes).

Remove an additional 30 mm on the wide side of the beam + remove an additional 10 mm of the rail (due to the absence of a closing profile with double doors).

Zusätzliche 30 mm an der breiten Seite des Balkens entfernen + zusätzliche 10 mm an der rail (wegen des Fehlens einer Abschlussprofil bei Doppeltüren).
